

Mohd Numair Khan GLOBAL REPORTING & BI ANALYST

✉ mohdnumair11@gmail.com ☎ +49 15204542813 📍 München Germany 🚩 Indian 🌐 LinkedIn

👤 Profile

Data and BI Analyst with experience developing automated reporting, KPI dashboards and data-quality solutions across operational, ERP and global sustainability data. Hands on experience with Power BI, DAX, Power Query, SQL, Excel and Databricks/PySpark, including reporting solutions supporting 400+ global sites. Strong quantitative background in Statistics and Operations Research, with practical experience in data validation, reporting automation, KPI development, stakeholder collaboration and continuous improvement.

🎓 Education

2023/10 – present München, Germany	Technische Universität München , <i>Master of Science in Sustainable Resource Management</i> Modules: Carbon Accounting & Environmental Footprints, Climate Data Analysis, Supply Chain Analytics, Demand Forecasting, Business Decision Modelling, Financial & Quantitative Analysis.
2016/06 – 2018/06 Aligarh, India	Aligarh Muslim University, India , <i>Master of Science (Hons.) Operations Research</i> Modules: Statistical Modeling, Data Analysis, Optimization, Econometrics.
2013/09 – 2016/04 Aligarh, India	Aligarh Muslim University, India , <i>Bachelor of Science (Hons.) Statistics</i> Modules: Probability & Statistical Inference, Econometrics, Hypothesis Testing, Quantitative Analysis.

💼 Work Experience

2026/04 – Present Düsseldorf, Germany	Environmental Data Management Intern, Henkel • Develop and enhance Power BI reporting solutions for 400+ global sites, transforming environmental data into KPI dashboards for performance monitoring, reporting completeness and management decision making. • Build automated data quality and reporting completeness controls using Power Query and DAX, identifying missing, incomplete, zero reported and inconsistent submissions across environmental KPIs. • Developed CSRD reporting dashboards covering climate and emissions, energy, water, wastewater and waste, creating structured views for analysing performance across sites and reporting periods. • Created management reporting solutions combining KPI performance with executive summaries, performance commentary, key drivers and key challenges to improve visibility of reporting trends and risks. • Improved waste transactional reporting through validation of hazardous classification, disposal pathways, zero reporting and missing transactional data. • Supported fleet reporting by analysing approaches for collecting mileage, fuel and electricity consumption data and improving the reliability of fleet emissions reporting. • Performed plausibility checks for Emissions to Air, reviewing reported NOx and particulate matter (PM) values and calculation inputs such as operating hours to identify inconsistencies and improve data reliability. • Built a Databricks/PySpark data quality prototype combining completeness, missing value, duplicate record and anomaly checks with risk scoring to explore scalable identification of reporting issues.
2025/02 – 2025/04 New Delhi, India	ERP & BI Reporting Intern, Godrej & Boyce Mfg. Co. Ltd. • Built and automated 20+ weekly and monthly KPI reports covering sales, operations and financial performance. • Used SQL to query and validate 100,000+ ERP records, improving the accuracy and reliability of reports. • Automated recurring Excel tasks using Power Query, PivotTables, XLOOKUP and VBA, reducing manual reporting effort by 30%. • Analysed sales and operational performance to identify variances and support regular business reviews.

2019/10 – 2022/11
Lucknow, India

Junior Business Analyst (Supply Chain & Operations), Shalimar Corp. Limited

- Worked closely with operations and finance teams to understand business processes, reporting challenges, and performance gaps.
- Gathered and documented business requirements, translated them into structured KPI definitions, and aligned them with the reporting team.
- Analyzed 500,000+ transaction records using SQL to validate system outputs and identify process inefficiencies.
- Participated in testing and validation before rolling out updated dashboards and reporting logic.
- Standardized reporting structures and supported adoption across departments.
- Contributed to 8–10% cost optimization and significantly improved reporting consistency and cross-team alignment.

 Key Projects

- Environmental Data Digitalisation & Reporting Transformation, Power BI | DAX | Power Query | Databricks | Data Quality**
- Problem: Environmental reporting across 400+ sites required better visibility of reporting gaps, inconsistent submissions and data-quality issues across multiple KPIs.
 - Solution: Designed an integrated reporting approach that connects reporting completeness, KPI performance and data quality validation, allowing users to move from global management views to individual site and reporting issues.
 - Built automated validation and traffic light logic to distinguish reported, zero-reported, incomplete and missing data and highlight exceptions requiring attention.
 - Developed a Databricks data quality prototype using completeness, missing value, duplicate record and statistical anomaly checks to generate site level quality and risk indicators.
 - Created structured Power BI views for management and operational analysis, reducing reliance on manual investigation and making reporting issues easier to identify and prioritize.

 Ceritifications
